Name: _____ Date: _____

Worksheet W3 · W-Seminar "Time"

Dimensions of time

Time is not one thing. Today you become the expert for one of its dimensions – and look for your own question.

1 Warm-up: feel ten seconds

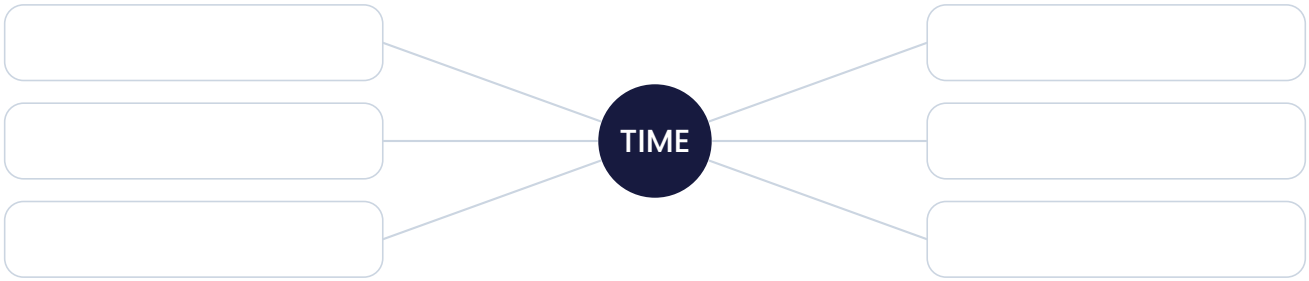
Open the website, scroll to *Psychology* and do the experiment: three tries just waiting, three tries counting backwards.

	try 1	try 2	try 3	mean
just wait				
counting				

What could explain the difference?

2 Before you look: where does time show up?

Collect everything you associate with time – subjects, situations, films, books, feelings.



3 Expert group: your dimension

Our dimension

☐ Literature ☐ Physics ☐ Computer science ☐ Psychology ☐ Language ☐ And beyond

Explore your section on the website (15 min). Read, try every interactive part, discuss. Then fill in your expert card together.

The key idea in one or two sentences

The most surprising fact

What we found out with the interactive part

A question that still bothers us

A possible Seminararbeit question – and how we could find out (survey, experiment, text analysis, measurement …)

4 Pitch and listen

Each group pitches its dimension in **90 seconds**: key idea, wow fact, one question. Listen and take notes.

	key idea	a question I find interesting
Literature		
Physics		
Computer science		
Psychology		
Language		
And beyond		

5 Connect two dimensions

Example: In Ted Chiang's "Story of Your Life", learning a new language changes how a character experiences time – and so the story is told in a new tense.

Your connection: _____ + _____

_____

_____

_____

6 Exit ticket

My two favourite dimensions: _____ and _____

A question I might research

_____

_____

_____

How ready do I feel to choose a topic? not at all (1) (2) (3) (4) (5) ready
